## Languages

Greek: Native  
English: C2 (2010)

Last updated:

September 13<sup>th</sup>, 2024

## Education

2013-2021 **M.Eng. in Computer Science and Engineering** University of Ioannina  
Master of Engineering program at the Computer Science & Engineering Department (CSED), School of Engineering, University of Ioannina (UOI).  
Thesis: "Topology and synchronization in OpenMP for manycore NUMA systems"  
Advisor: Vassilios V. Dimakopoulos

## Work Experience

07/2024-Present **Senior 5G Telecom Software Engineer** Nokia, Athens  
Development of new Fixed Wireless Access (FWA) 5G products.

07/2022-06/2024 **Junior 5G Telecom Software Engineer** Nokia, Athens  
Development of new Fixed Wireless Access (FWA) 5G products.

09/2021-06/2022 **Lance Corporal** 32<sup>nd</sup> Marines Brigade, Hellenic Army  
Served conscription at the 32<sup>nd</sup> Signal Company as an operator at the Communications Center (COMCEN).

10/2013-02/2016 **Computer and Network Technician** CSED, University of Ioannina  
The Computer Systems Support Group provides assistant work in the management of departmental computing resources, develops software applications & aids in the operation of educational computer laboratories.

## Research Groups

02/2015-09/2021 **Parallel Processing Group (PPG)** CSED, University of Ioannina  
PPG's main research interests lie in the area of parallel and distributed systems. I was also the lead system administrator of PPG since 2016.

## Research Projects

09/2017-08/2018 **PRACE-5IP** National Infrastructures for Research & Technology (GRNET)  
Participated as a parallel programming instructor in the first year of operation of the *Partnership for Advanced Computing in Europe* Training Centre established by GRNET.

## Teaching Assistance

2016-2021 **Systems Programming (core undergraduate)** CSED, University of Ioannina  
The C programming language and POSIX systems programming using C.  
Semesters: Fall 2016, 2017, 2018, 2019, 2020 (remote due to COVID-19)

## Programming Skills

- General-purpose programming: C, Java SE, Python
- Shells: Bash, Bourne Shell
- Parallel programming: POSIX threads, OpenMP, MPI
- Systems programming: GNU/Linux
- GPIO library: WiringPi (for Raspberry Pi)
- Scientific computing: GNU Octave
- Other tools: Portable Hardware Locality (hwloc)

I am also familiar with MIPS Assembly, C++, Haskell, JavaFX, JUnit and Apache Lucene.

## Computing Skills

- Backup Tool: Attic
- Databases: Round Robin Database (*RRDtool*)
- Hypervisors: VirtualBox, VMware ESXi, VMware Workstation
- Operating Systems: GNU/Linux (*Debian-based distributions*)
- Packet Analyzer: Wireshark
- Server Administration: Debian, Raspberry Pi OS, CentOS
- Single Board Computer: Raspberry Pi
- Version Control: Git, Gerrit (Code review), Gitolite (Git Repository Hosting)
- Miscellaneous: Jira, Confluence, Microsoft 365

## Software Projects

- 06/2016-09/2021 **OMPI compiler** Parallel Processing Group, CSED, UOI  
Open source OpenMP compiler and runtime system for C. Among others, I implemented a NUMA-aware barrier, the OpenMP places and OpenMP processor binding policies. For more information visit: [cse.uoi.gr/~omp](http://cse.uoi.gr/~omp)
- 02/2018-02/2021 **MARS Stack Visualizer** CSED, University of Ioannina  
A tool for MIPS Assembler and Runtime Simulator (MARS) that allows real time visualization of stack segment modification operations.
- 01/2015-02/2016 **Aeolus Logger** Computer Systems Support Group, CSED, UOI  
A logging system integrated with Emerson cooling units, that monitors the environmental conditions of the cluster room in CSE Department.

## Repositories

- Backup-script [*BASH*] - [gzachos.com/backup-script](http://gzachos.com/backup-script)
  - A shell script that backups the directories specified in the configuration section and manages old backup files.
- Door-monitor [*C*] - [gzachos.com/door-monitor](http://gzachos.com/door-monitor)
  - Door status monitoring and email notification system using Raspberry Pi.
- Nla-course-uoι [*C, Octave*] - [gzachos.com/nla-course-uoι](http://gzachos.com/nla-course-uoι)
  - Implementation of the Cholesky decomposition, Steepest Descent and Conjugate Gradients methods for solving linear systems.
- Compilers-course-uoι [*Python*] - [gzachos.com/compilers-course-uoι](http://gzachos.com/compilers-course-uoι)
  - A compiler implementation for a minimal programming language that has borrowed its characteristics from C and Pascal, targeting the MIPS32 ISA.
- Cgis-course-uoι [*C++*] - [gzachos.com/cgis-course-uoι](http://gzachos.com/cgis-course-uoι)
  - OpenGL application for polygon drawing, coloring, clipping and 3D extrusion.

For a full list of my publicly available repositories visit my GitHub profile.

## Honors and Awards

- |            |  |   |
|------------|--|---|
| 09/05/2022 | <b>Honorary Distinction &amp; Service Award</b>  | 32 <sup>nd</sup> Marines Brigade, Hellenic Army |
|            | Promoted to the rank of lance corporal and awarded the "Prosperous Service Award" for demonstrating ethos and excellence during service. |   |
| 21/10/2016 | <b>Recognition Award</b>   | CSED, University of Ioannina                    |
|            | The Dean of CSED awarded me for my contribution to the Computer Systems Support Group.   |   |
| 19/11/2015 | <b>Contribution Award</b>  | Greek Free and Open Source Software Society     |
|            | Awarded for the localization of Elgg social networking engine.   |   |

## Seminars and Panels

### PARTICIPATED AS A SPEAKER

- |      |   |                              |
|------|---|------------------------------|
| 2023 | <b>2<sup>nd</sup> Alumni Day</b>  | CSED, University of Ioannina |
|      | Participated in the "Companies and Entrepreneurship" panel.             |                              |
| 2014 | <b>University of Ioannina IEEE Student Branch</b>                       | Ioannina                     |
|      | Participated in two seminars covering various GNU/Linux-related topics. |                              |

## Organizations

6/2014-Present Greek Free and Open Source Software Society (GFOSS)
