

# George Z. Zachos

Master of Engineering in Computer Science & Engineering

## General Information

Military Service:  
Expected completion  
is on June 2022.

## Contact

gzzachos@gmail.com  
gzachos@cse.uoi.gr

## Websites

cse.uoi.gr/~gzachos

## Social Links

LinkedIn  
GitHub

## Languages

Greek: Native  
English: C2 (2010)

Last updated:  
April 16<sup>th</sup>, 2022

## Education

2013-2021 **M.Eng. in Computer Science and Engineering** University of Ioannina  
Master of Engineering program at the Computer Science & Engineering  
Department (CSED), School of Engineering, University of Ioannina (UOI).  
Thesis title: "Topology and synchronization in OpenMP for manycore  
NUMA systems" Advisor: Vassilios V. Dimakopoulos

## Work Experience

10/2013-02/2016 **Computer and Network Technician** CSED, University of Ioannina  
The *Computer Systems Support Group* provides assistant work in the  
management of departmental computing resources, develops software  
applications for departmental use & aids in the operation of educational  
computer laboratories. In the last two months I conducted my internship.

## Research Groups

02/2015-09/2021 **Parallel Processing Group (PPG)** CSED, University of Ioannina  
PPG's main research interests lie in the area of parallel and distributed  
systems. I was also the lead system administrator of PPG since 2016.  
For more information visit: [paragroup.cse.uoi.gr](http://paragroup.cse.uoi.gr)

## Projects

09/2017-08/2018 **PRACE-5IP** National Infrastructures for Research & Technology (GRNET)  
I participated as a parallel programming instructor in the first year of op-  
eration of the *Partnership for Advanced Computing in Europe* (PRACE) Training  
Centre (PTC) established by GRNET.

## Teaching Assistance

2016-2021 **Systems Programming (core undergraduate)** CSED, University of Ioannina  
The C programming language and POSIX systems programming using C.  
Semesters: Fall 2016, 2017, 2018, 2019, 2020 (remote due to COVID-19)

## Programming Skills

- General-purpose programming: C, Java SE, Python
- Shells: Bash, Bourne Shell
- Parallel programming: POSIX threads, OpenMP, MPI
- Systems programming: GNU/Linux
- GPIO library: WiringPi (for Raspberry Pi)
- Scientific computing: GNU Octave
- Other tools: Portable Hardware Locality (hwloc)

I am also familiar with MIPS Assembly, C++, Haskell, JavaFX, JUnit and Apache Lucene.

## Computing Skills

- Backup Tool: Attic
- Databases: Round Robin Database (*RRDtool*)
- Hypervisors: VirtualBox, VMware ESXi, VMware Workstation
- Operating Systems: GNU/Linux (*Debian-based distributions*)
- Packet Analyzer: Wireshark
- Server Administration: Debian, Raspberry Pi OS, CentOS
- Single Board Computer: Raspberry Pi
- Version Control System: Git, Gitolite (Git Repository Hosting)

## Software Projects

- 06/2016-09/2021 **OMPI compiler** Parallel Processing Group, CSED, UOI  
An open source OpenMP compiler and runtime system for C. Among others, I implemented a NUMA-aware barrier, the OpenMP places and OpenMP processor binding policies. For more information visit: [cse.uoi.gr/~ompi](http://cse.uoi.gr/~ompi)
- 02/2018-02/2021 **MARS Stack Visualizer** CSED, University of Ioannina  
A tool for MIPS Assembler and Runtime Simulator (MARS) that allows real time visualization of stack segment modification operations. Thesis topic provided by Aris Efthymiou; conducted as a side project. For more information visit: [gzachos.com/mars-stack-visualizer](http://gzachos.com/mars-stack-visualizer)
- 16-20/04/2016 **Implementation of FSS policy in MINIX** CSED, University of Ioannina  
During the Operating Systems course, I extended the system kernel of MINIX 3.2.0 to support the fair-share scheduling (FSS) policy.
- 01/2015-02/2016 **Aeolus Logger** Computer Systems Support Group, CSED, UOI  
This project is about the implementation of a logging system and its integration with Emerson cooling units, so that it can be used to monitor the environmental conditions of the cluster room in CSE Department.

## Repositories

- **Backup-script** [*BASH*] - [gzachos.com/backup-script](http://gzachos.com/backup-script)
  - A shell script that backs up the directories specified in the configuration section and manages old backup files.
- **Door-monitor** [*C*] - [gzachos.com/door-monitor](http://gzachos.com/door-monitor)
  - Door status monitoring and email notification system using Raspberry Pi.
- **Nla-course-uoι** [*C, Octave*] - [gzachos.com/nla-course-uoι](http://gzachos.com/nla-course-uoι)
  - Implementation of the Cholesky decomposition, Steepest Descent and Conjugate Gradients methods for solving linear systems.
- **Compilers-course-uoι** [*Python*] - [gzachos.com/compilers-course-uoι](http://gzachos.com/compilers-course-uoι)
  - A compiler implementation for a minimal programming language that has borrowed its characteristics from C and Pascal, targeting the MIPS32 ISA.
- **Cgis-course-uoι** [*C++*] - [gzachos.com/cgis-course-uoι](http://gzachos.com/cgis-course-uoι)
  - OpenGL application for polygon drawing, coloring, clipping and 3D extrusion.

For a full list of my publicly available repositories visit my GitHub profile.

## Honors and Awards

- |            |  |   |
|------------|--|---|
| 21/10/2016 | <b>Recognition Award</b>   | CSED, University of Ioannina                |
|            | The Dean of CSED awarded me for my contribution to the Computer Systems Support Group. |   |
| 19/11/2015 | <b>Contribution Award</b>  | Greek Free and Open Source Software Society |
|            | Awarded for the localization of Elgg social networking engine.                         |   |

## Seminars

### PARTICIPATED AS A SPEAKER

- |      |   |          |
|------|---|----------|
| 2014 | University of Ioannina IEEE Student Branch                              | Ioannina |
|      | Participated in two seminars covering various GNU/Linux-related topics. |          |

## Organizations

6/2014-Present Greek Free and Open Source Software Society (GFOSS)
